PROFILE SUMMARY

Motivated Computer Engineering student at **Sanjivani College of Engineering** with an interest in software development, web technologies, Java, Python, databases, and problem-solving. Experienced in developing academic projects and eager to learn new technologies and gain practical industry experience.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++
- **DSA:** Data Structures & Algorithms with Java
- **Web:** HTML, CSS, JavaScript
- **Database:** MySQL
- **Tools:** Git, GitHub, VS Code
- **Interests:** Software Development, Web Development, IoT

PROJECTS

Taste of India

- Developed a web-based project focused on Indian cuisine and food information.
- Designed a simple and user-friendly interface using web development concepts.

EduSolve – Solution for Engineering Students

- Developed a platform providing useful academic resources for engineering students.
- Focused on making educational information easily accessible to students.

Fitness Management System – Python

- Developed a fitness management application using Python.
- Applied programming and problem-solving concepts to manage fitness-related information.

EDUCATION

Bachelor of Engineering – Computer Engineering
Sanjivani College of Engineering | 2024 – Present

CERTIFICATION

Alpha – Data Structures & Algorithms with Java
Apna College — Certificate of Completion

KEY STRENGTHS

Problem Solving | Quick Learning | Teamwork | Adaptability | Communication
